EXPERIENCE

- 2010 - present

Jack Henry & Associates
Sr. Product Designer

Responsible for the design and crafting the experience for bank-facing products in the Banno product line. Created and maintain a visual style guide and design system for consumer and enterprise web applications.

Lead bank website redesign projects from 2010 to 2012. Created a number of marketing assets. Designed a custom content management system and a platform of responsive administrative applications. Designed and maintain Banno.com website to promote the Banno platform of products.

Won two ADDY Awards for website design.
- 2008 - 2010

Freelance
Web designer & developer

Various freelance web design and development work for local businesses and video game review websites.

EDUCATION

- 2008 - 2011

BS Internet Marketing
Full Sail University

ABILITIES

Product design

- Workflow diagramming

From a design brief, help define functional scope and definition through diagramming how someone would use the product.
- Prototyping

Prototypes can be made from low-fidelity wireframes or high-fidelity comps; from Keynote slides or InVision projects to functioning HTML, CSS and JavaScript.
- Visual design

Using Sketch or Adobe Illustrator to create high fidelity comps. Designs are always created as vector images for high density displays.
- User research

Creating scripts and carrying out testing of application designs with real people. Compiling results and sharing with teams to record findings.
- Web development

Writing performant and maintainable systems in HTML and CSS. Engineering JavaScript applications with AngularJS and React, including React Native for iOS and Android.
